Art Unit: 2816

1

1. The amendment filed on 1/16/06 has been received and entered in the case.

- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 3. Claims 1-5, 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is misdescriptive, and therefore indefinite, to recite that the push/pull signals are "level shifted from the output of the differential amplifier" because, as shown in the instant drawing Fig. 3, the push/pull signals (which are the outputs from monitoring stage 302) do not get level shifted.

4. The drawings are objected to because of the above-noted problem with the recitation that the push/pull signals are level shifted (because this is not shown in instant Fig. 3).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior

Art Unit: 2816

1 .

version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

5. The amendment filed on 1/16/06 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the recitation of the push/pull signals being level shifted, as added to independent claim 1.

Art Unit: 2816

•

Applicant is required to cancel the new matter in the reply to this Office Action.

6. Claims 1-5, 7 and 8 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Note the above-noted problem with the new limitations added to claim 1.

7. Claims 1-5, 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over any one of Miyabe, Kogushi, Hunt, Garcia and Sanwo in view of any one of Taguchi, Taito, Morishita and Cruz et al.

See paragraph three of the office action mailed on 10/17/05 for the details of this rejection. As to the new limitation that the push-pull signals are level shifted, this is not supported by the originally filed application, as noted above, and therefore cannot be relied upon to distinguish over the above-noted prior art.

Art Unit: 2816

8. Claims 9 and 11-18 are allowed.

Claims 19-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Applicant's arguments filed on 1/16/06 have been fully considered but they are not persuasive.

The first argument is that "the primary requirement is that problems intended to be solved by each prior art reference should be explicitly or implicitly not only addressed and identical each other [sic], but identical to that of the present invention as well". This argument is not persuasive because it is not a correct statement of current U.S. patent law, and the examiner is unaware of any case law or MPEP provision which states this.

The further arguments set forth on pages 13 through 16 of the 1/16/06 response are similarly not persuasive because they are not reflected in the claims, i.e., in order to properly define over applied prior art, applicant should point out the specific limitations in the claims not disclosed or suggested by the prior art.

Art Unit: 2816

4

10. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth B. Wells whose telephone number is (571)272-1757. The examiner can normally be reached on Monday through Friday from 8:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy P. Callahan, can be reached at (571)272-1740. The fax phone number for the
